

10D kNN-20 scores projected onto frozen reference PCA

Distances computed in 10D; grey = successful A reference; no 10D contour inferred

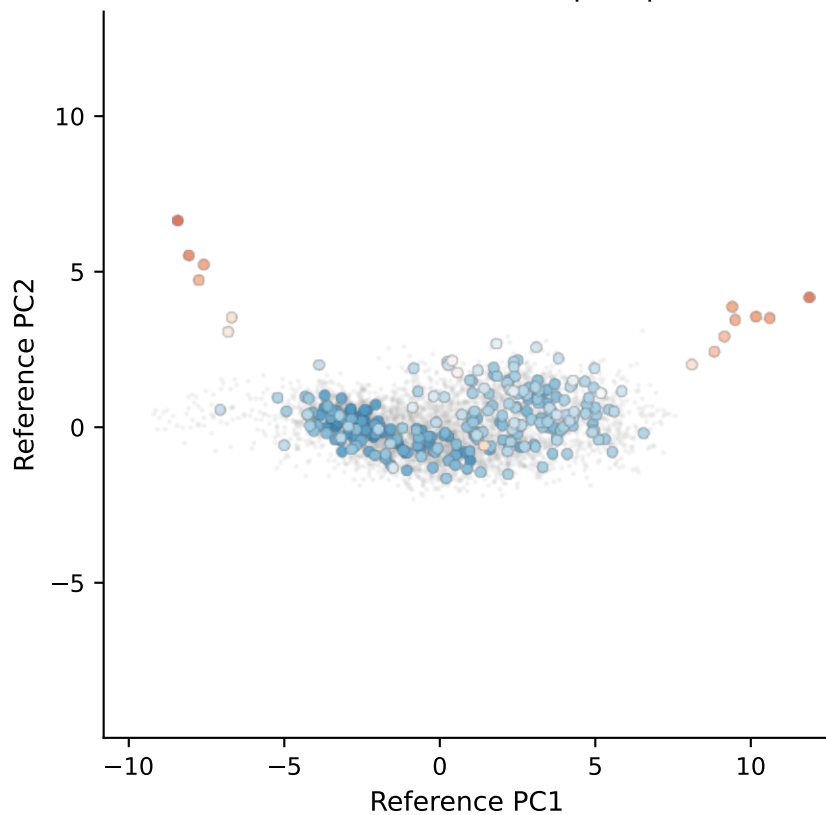

Goal: 10D score shown at its 2D position
PCA variance 87.5%; 101/344 sampled points exceed

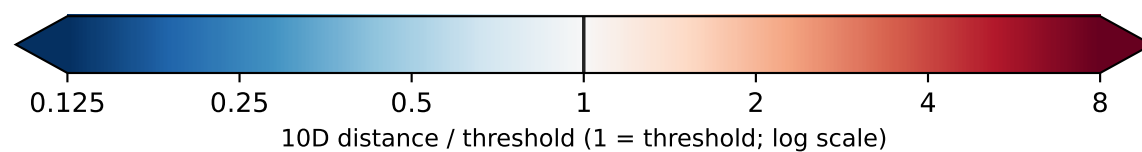

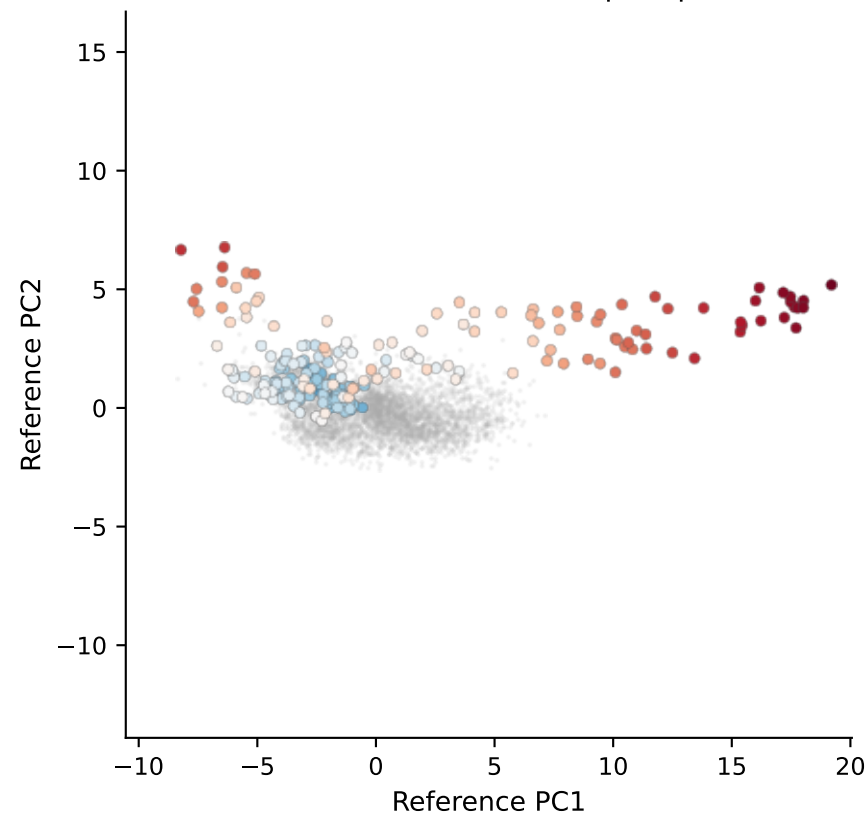

Long: 10D score shown at its 2D position
PCA variance 87.1%; 11/336 sampled points exceed

Object: 10D score shown at its 2D position
PCA variance 86.1%; 17/259 sampled points exceed

Spatial: 10D score shown at its 2D position
PCA variance 82.3%; 102/223 sampled points exceed

Same failure-enriched unseen B sample as the original figure; split 20260907. Point counts are not trajectory detection rates.
