

Spatial: identical points and PCA coordinates, different scoring dimensions
48 unseen B trajectories, 223 sampled queries; PCA retains 82.3% variance

● Neither exceeds: 121
● Both exceed: 72
✕ 10D only: 30
+ 2D only: 0

Green line belongs only to the 2D method. Decisions use current scores, not latched alarms. Labels only affect illustration sampling and progress color.
