

逐步 kNN：白杯放到盘子上，巧克力布丁放到盘子右侧
失败轨迹 | LIBERO-Long | episode 223 | 初始状态 27 | 噪声种子 1015 | 52 次推理 / 520 个实际动作

原始 10D / 20NN | 未见任务折 libero_long_20260907 | 阈值 4.0678 | 无噪声干预，最终未完成任务

回到阈下 ≠ 已救回

q33 已触发一次报警；q36–40 只是当前距离回落。
q41 起再次越界，直到最后一次推理。

以后改变噪声的分支应从同一记录状态出发，
用相同执行预算比较最终结果与 MoE 演化。
本图没有新增 rollout，也没有救回实验结果。

画面是已校验的记录状态重绘，每格均为执行当前 chunk 之前；q51 不是终止后的画面。近邻和分数在 10D 计算，二维连线长度不能替代原距离。
