

First alarm within actual trajectory duration | shared external cohort

Positions use executed actions / final actions; unalarmed failures remain in the denominator

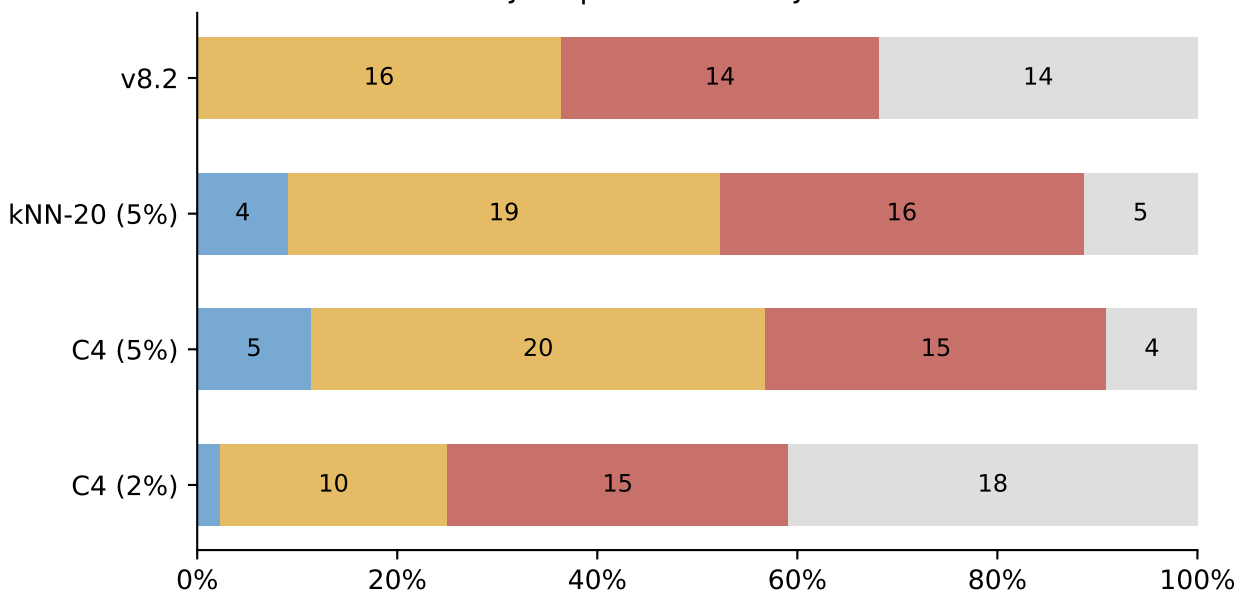

Goal | 106 failed trajectories

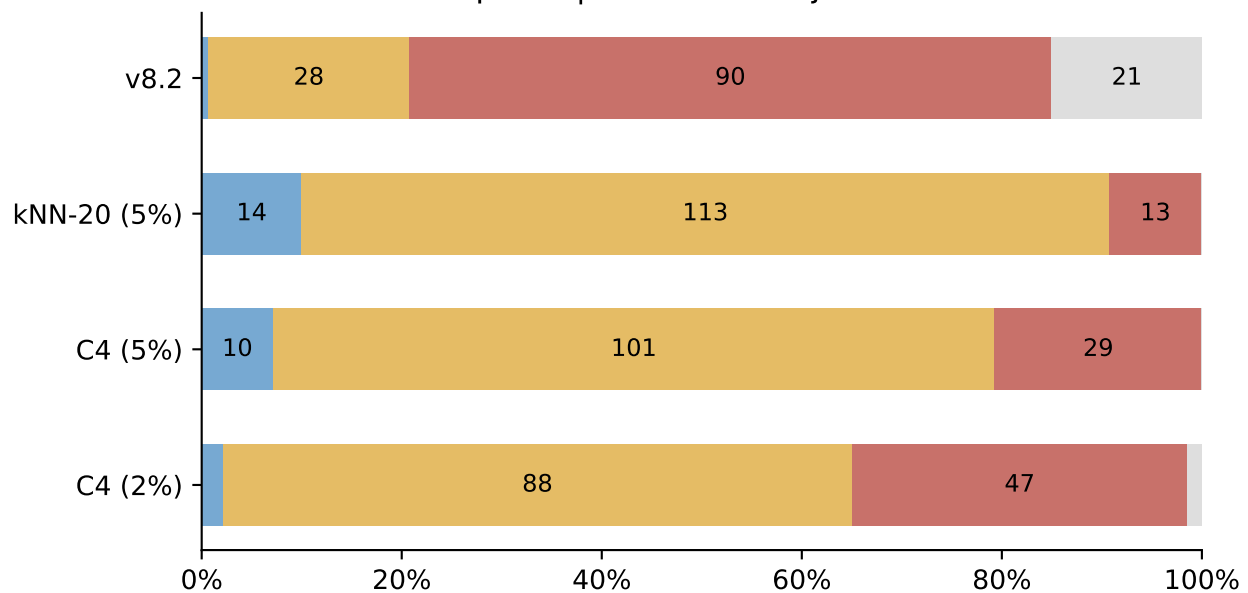

Long | 274 failed trajectories

Object | 44 failed trajectories

Spatial | 140 failed trajectories

Position at first alarm (retrospective); numbers inside bars are trajectory counts

0-25% 25-50% 50-75% 75-100% no_alarm
