

Recurrence in MoE state space: failures sit in a compact recurrent regime (RR / LAM / LMAX), true loops (RET) are absent

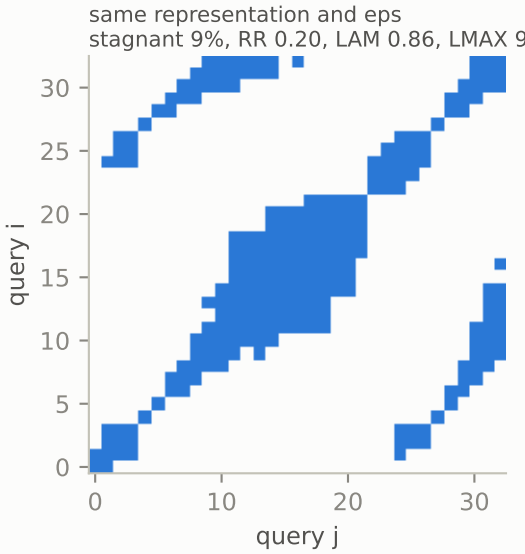

(a) stagnant failure: task07-CameraViewpoints-0-init00

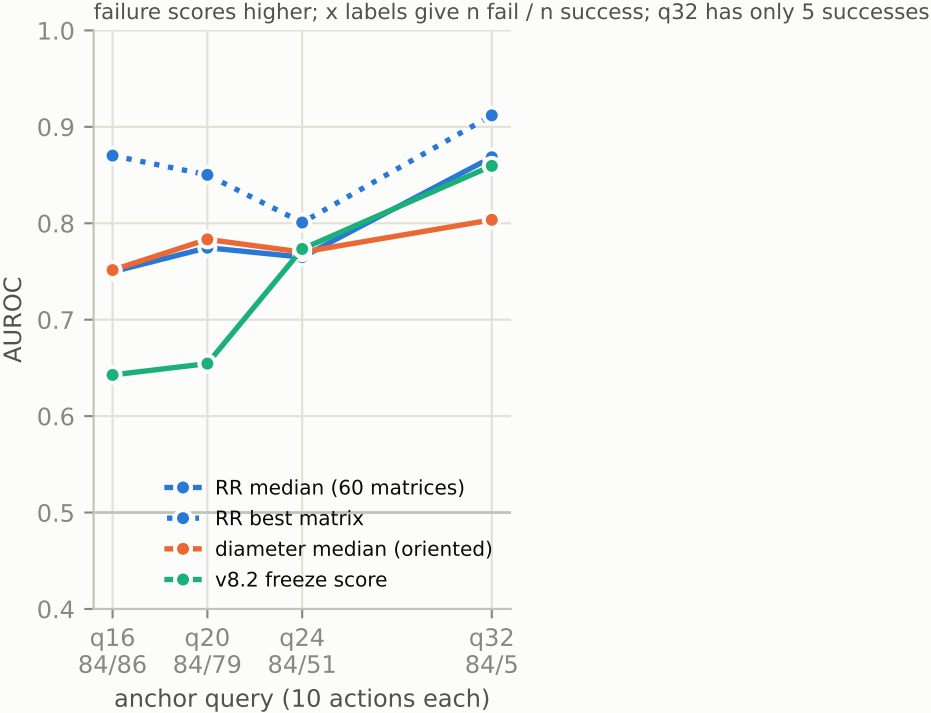

(b) moving failure: task04-CameraViewpoints-0-init00

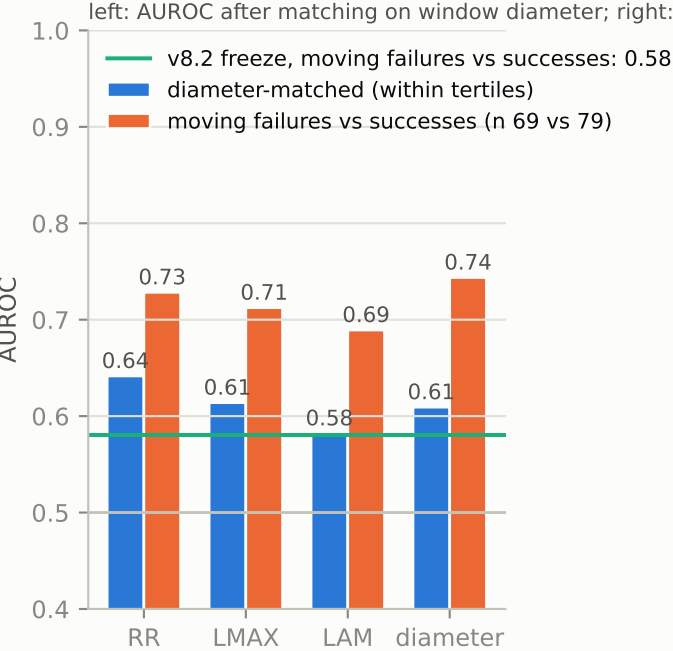

(c) success: task06-init02

(d) Causal outcome AUROC at anchors (pooled)

(e) Beyond magnitude at q20 (median of 60 matrices)

(f) Robustness over settings
